

## FLOOR SANDER ABRASIVES

Quality silicon carbide and aluminium oxide, resin bonded abrasives, with superb performance and wear characteristics.

### DESCRIPTION

High quality die-cut resin bonded, silicon carbide grit abrasive sheets and discs. Premium graded silicon carbide, resin bonded to heavy craft and fibre backings, is used to provide a high performance, hard wearing abrasive designed for drum and edger floor sanding.

For the HTF-2 Floor Sander an innovative sanding and re-finishing system for all types of wood floors including pre-finished and laminates. This system consists of a abrasive pad and a range of adhesive backed abrasive sheets with a high grit density and a special anti-loading coating to maximize production rates.

Always use Hiretech abrasives to reduce the risk of operator complaint due to poor fitting and to maximize sander performance.

### USES

The Hiretech floor sander abrasives are designed for sanding all types of wooden floors, including parquet and pre-finished floors, that require rapid sanding, leveling, re-surfacing and re-finishing to a fine score free finish. These high quality abrasives should also be used for hand sanding and finishing difficult to reach areas and blemishes where required.

### FEATURES

Accurately die-cut to exact specifications helping to ensure trouble free fitting and the correct fit to eliminate tearing, a source of operator complaint. The high quality silicon carbide grit maintains its cutting edge for a superior sanding performance and longer life. Clear packaging and labeling allows easy selection and effective display.
