

WALLPAPER PERFORATOR

A high quality hand tool design to quickly and safely perforate all types of wall covering to speed the penetration of steam for fast, effective wallpaper stripping.

DESCRIPTION

The unique 'V' shaped perforating head and spiral pin pattern perforates all types of wall coverings without damaging the underlying wall surface. The configuration of the perforating head cuts 'V' shaped perforations into the wall covering as it is rolled across the surface maximising the penetration of steam and stripping solutions. Safe to use on all wall types including plaster, plaster board and dry wall linings. Suitable for professional and home owner use.

USES

Use on all types of wall covering including vinyl, foil, flock, woodchip and multi layered papers, including painted over wallpaper. Perforate wall coverings prior to stripping with a steam wallpaper stripper or stripping solution.

FEATURES

A high quality hand tool with a the perforator heads come complete with protective covers. A injected moulded yoke keeps the perforator head at the right angle at all times stopping unnecessary pressure being applied, making the job easier and preventing damage to the underlying wall surface.

To use, place the perforator at the top of the area to be perforated and pull down towards you with even strokes. For difficult coverings such as hessian, multi layered and painted over papers perforate down and across.

SPECIFICATIONS

Product Code:	09060
Description:	Heavy Duty Perforator
Configuration:	Angled 'V' head design. Two chrome plated spiral spiked rollers with nylon bushes, 56 spikes per roller.
Yoke:	Injected moulded.
Handle:	Steel tube with soft rubber cover. Length 435mm (17")
Total Length:	530mm (21")
Weight:	0.7kg (1.54lbs)
Shipping Weight:	0.9kg (1.98lbs)
Warranty:	1 year
